

PBL InterferonSource

HUMAN INTERFERON BETA, 1a (mammalian)

Product Number: 11410-2

Lot Number:

Size: $\geq 1 \times 10^6$ units

Description: Recombinant Human IFN beta 1a, mammalian (Hu IFN- β 1a)

Contents: $\geq 1 \times 10^6$ units/vial

Volume: 0.1 ml

Concentration: $\geq 1 \times 10^7$ units/ml

Buffer: 10 mM Acetic Acid

Endotoxin: < 1 EU/ μ g

Molecular Weight: ~ 23 kDa

Purity: $> 95\%$, one N-linked glycosylation site

Purification Method: Proprietary chromatography methods

Source: cDNA obtained from human fibroblast mRNA expressed in CHO cells

Synonyms: Fibroblast Interferon

Accession #: V00534

Assay Used to Measure Bioactivity: Interferon was titrated with the use of the cytopathic effect inhibition assay as described [Familletti, *et al.* (1981) "A Convenience and Rapid Cytopathic Effect Inhibition Assay for Interferon," in *Methods in Enzymology*, Vol. 78 [S. Pestka, ed.], Academic Press, New York, 387-394]. Encephalomyocarditis virus (EMCV) was used to challenge A549 cells [Budd *et al.* (1985) *Canc. Chem. Pharm.* 12:39]. The activity was determined relative to a lab standard of Hu IFN- β which was calibrated to the NIH Hu IFN- β standard [Gb23-902-531]. The EC_{50} for IFN is ~ 1 U/ml. Specific Activity $\times 10$ units/mg.

Shipping Conditions: Wet Ice

Physical State of Product During Shipping: Liquid

Special Conditions/Comments: After receipt, this product should be kept at 2- 8 °C for retention of full activity. Further dilution of this product for long term storage is not recommended. For more information on protein handling visit the PBL website at www.interferonsource.com.

For further product information visit www.interferonsource.com

Authorization

Released by: _____

Date:

This Product is for RESEARCH USE ONLY and is not for sale or use in any commercial kit or for use in the preparation of any commercial antibody. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE, OR USE IN HUMANS.
